

Human Development & Family Studies

We are accepting applications to our **Ph.D. program** in Applied Developmental Sciences (ADS) and **Master's programs** in Prevention Science and Marriage and Family Therapy in the Department of Human Development and Family Studies (HDFS) at **Colorado State University**. Both our ADS doctoral program and our MFT Master's programs are ranked in the top 20 within the U.S.

Faculty members in **Risk, Resilience, & Developmental Psychopathology (RRDP)** conduct research on individual, familial, and community-level factors contributing to typical and atypical developmental outcomes across the lifespan.

Our department provides a collegial and energetic learning environment and excellent interdisciplinary research training.

Questions about our graduate program, research, or funding? Contact us at: hdfsgradinfo@colostate.edu
