## Early Childhood Professions Concentration

The courses in the Early Childhood Professions Concentration prepare students for careers in early childhood education as well as professional work with children across a variety of settings, including working with children with special needs. This concentration is an ideal choice for first and second year HDFS majors who plan to apply to the competitive on-campus Early Childhood Education Major during their sophomore year. As well, this concentration is the preferred choice for students interested in early childhood education careers that do not require teacher licensure or for students who will pursue a graduate degree and licensure in childhood education. Students interested in working with children with special needs, those seeking director qualifications in early childhood education, and those seeking other relevant credentials would also benefit from choosing this concentration. The curriculum incorporates courses from several disciplines that focus on early child development, education, diversity, and professional skills.

*Students must earn a “C” or higher in concentration courses. Courses may NOT double count for courses fulfilling AUCC, other HDFS requirements, or a second concentration.*

---

**Students must complete a minimum of 15 credits from the course options below for the Early Childhood Professions Concentration; with at least 9 credits of HDFS prefix courses and 12 credits of upper division. *indicates the course is offered online**

**Required course (for students who declare this concentration during or after Fall 2016)**
